

## BoMRA delivers the following health outputs:

1	Assess medicines. Only those that meet the standards of Quality, Safety and Efficacy are registered for your access.	
2	Inspect pharmacies and other medicine retailers to ensure compliance with good practices. Only those that meet set standards are licensed to serve you.	
3	Help you report adverse reactions from the use of any medicine or vaccine. This helps us to take regulatory action against unsafe medical products.	
4	Issue import licenses to control the entry of medicines and vaccines into Botswana. Only licensed products are allowed into Botswana.	
5	Collect and test medicinal samples for standards of quality, safety and efficacy. Medicines that do not meet the set standards are removed from the supply chain.	
6	Monitor and remove illegal, misleading and unethical adverts of medical products.	
7	Through our Post-Marketing and Surveillance program, we monitor and remove substandard and fake medicines from our supply chain.	
8	Investigate practices that do not comply with the MRSA and ensure their termination.	
9	Educate you and the general public about BoMRA and how together we can promote health outcomes.	
10	Train our professionals so they can deliver on the mandate	

The mandate of BoMRA is to implement the Medicines And Related Substances Act (MRSA)
